

Okinus app for BigCommerce

Installation Instructions

Installing the app in BigCommerce

Complete the following steps on your BigCommerce store

1. Find the Okinus app in the BigCommerce Marketplace at <https://www.bigcommerce.com/apps/okinus>
2. Click "Get This App"
3. Select the BigCommerce store you want to install the app on (existing or new)
4. Click "Install" on the Okinus app page in your BigCommerce store admin
5. Agree to the terms and conditions and click "Confirm" to be taken to the Okinus Gateway settings page

Configuring the Okinus Gateway app for BigCommerce store

Update the following settings on your Okinus Gateway settings page (*Apps > My Apps > Okinus Checkout*)

- Title: Okinus Checkout
- API Key: (provided by Okinus)
- storeID: (provided by Okinus)
- Retailer Slug: (provided by Okinus)
- Store Slug: (provided by Okinus)
- Active Environment: Sandbox (For testing purposes. Once testing is complete and you are ready to go live, switch to "Live".)
- Display Widget: Yes
- Widget Position: Choose Bottom Left or Bottom Right
- Apply Button Code Snippet (add in-line CSS to style the button as desired):

```
<button id="okinus-apply-button">Apply With Okinus</button>
```

With those settings in place, click the Verify API button. If the connection works, a green "Connected" message will appear. If the verification fails, check your API Key, Store ID, Retailer Slug, and Store Slug to verify they are correct.
